EMBERTON™

ELECTRICAL APPLIANCES

EMBERTON™

Established 1986

EMBERTON. INVEST FOR YOUR GUEST

"Investing in electrical engineering & technology to improve the safety, reliability & performance of electrical appliances worldwide"

Safety, robustness and reliability are built into all of our professional range of guest room products. Emberton products are a solid investment, adding value to your assets.

With 35 years of history – design, innovation & creativity is our passion and the very heart of Emberton.

Working closely with a panel of experienced hoteliers helps us to understand the trends, habits & behavior of guests, perfecting our product innovations all the way from development to production.

Emberton products are available through a global network of specialist hotel supply distributors, with professional support and service to match the expectation of the Emberton brand.

PATENTED

DUAL SAFE™, AN EMBERTON PROPRIETARY ELECTRICAL SAFETY SYSTEM, IS INTEGRATED INTO THE ELECTRICAL CIRCUIT TO DETECT TEMPERATURE

WHAT DOES IT DO?

DUAL SAFE™ prevents electrical appliances catching fire due to overheating.

HOW DOES IT WORK?

DUAL SAFE™ uses an organic, thermo-sensitive material, remarkably sensitive to abnormally high temperatures. Upon sensing critical heat levels, DUAL SAFE™ activates and the electrical current will be interrupted immediately and permanently.

Working independently from and in addition to the thermostat, DUAL SAFE™ system immediately cuts power to an appliance when temperatures reach critical levels.

WHAT DOES IT DO?

In most electrical appliances, the thermostat is the only safety system. Thermostats are very sensitive components and can become faulty or damaged by misuse. If the thermostat fails, it's easy for the appliance to catch fire.

DUAL SAFE™ acts as an additional safety system, preventing risk of an accidental fire when using an EMBERTON DUAL SAFE™ electrical appliance.

1. FASTEST GROWING PLANT IN THE WORLD

Bamboo is the world's fastest-growing plant, shooting out of the ground at an astonishing four centimetres per second. At this rate, certain bamboo species can grow 91 centimetres (about 35 inches) in a single day. A bamboo culm can be ready to re-harvest in a mere 3-5 years. Bamboo shoots are connected to their parent plant by an underground stem, called a rhizome. These rhizomatic cores are part of the reason why bamboo can grow so quickly.

2. DURABILITY AND SUSTAINABLE

Bamboo grows in dense forests where little light reaches the ground and there is strong evolutionary pressure to reach the sunlight as quickly as possible. Bamboo also plays an important role when it comes to protecting the soil and land around it; those long strong roots keep the soil together to prevent erosion.

3. ECO-FRIENDLY PRODUCTS

Bamboo is a climate-adaptable plant that can thrive in a number of different environments and has showcased remarkable resilience in the face of an impressive number of environmental stressors. Compared to an equivalent tree mass, bamboo produces 35% more oxygen and research has shown that bamboo can absorb as much as 12 tonnes of carbon dioxide per hectare per year. Bamboo can also be harvested without killing the plant's core that produces the collectible stalks, meaning that soil erosion is reduced throughout the harvesting process.

4. EROSION CONTROL AND SOIL PROTECTION

Bamboos are being used as living plants as well as construction material in different soil bioengineering techniques in many countries. Bamboo is a great tool for soil protection due to its rapid growth, permanent canopy and huge network of roots and rhizomes. The root system that grows in the surface layer of the soil (20 - 60 cm deep), can reach up to 100 km per hectare.

5. WATER CONSERVATION

Bamboo is a versatile and effective tool for water conservation efforts. It is increasingly used by environmental organisations and governments worldwide to help protect and conserve our precious water resources. Bamboo plants have a low water requirement and can grow in areas with limited water resources, helping to conserve water.

Say NO to PVC & PU Fake Leather.
Say Hello to Bamboo......

Plastic, particularly PVC (polyvinyl chloride) and PU (polyurethane), is widely used in various industries and products. However, there are several reasons why we should reduce our reliance on and avoid using these types of plastic. Some of the main reasons include:

1. ENVIRONMENTAL IMPACT

PVC and PU production involves the use of fossil fuels and synthetic chemicals, which contribute to air pollution, water pollution and greenhouse gas emissions. Additionally, these plastics are not easily biodegradable and can persist in the environment for hundreds of years, leading to long-term harm to ecosystems.

2. TOXICITY CONCERNS

PVC contains additives such as phthalates, lead and heavy metals, which can leach out and pose risks to human health. Exposure to these toxins has been associated with various health issues, including respiratory problems, hormonal disruptions, developmental disorders and certain types of cancer.

3. WASTE GENERATION

PVC and PU, like most plastics, generate significant waste during their production, use and disposal phases. The improper disposal and incineration of these plastics release toxic by-products and pollutants into the environment, further exacerbating environmental and health concerns.

4. RECYCLING CHALLENGES

PVC and PU pose challenges in terms of recycling. These plastics have different chemical compositions and require specialized recycling processes, which are often limited and costly. As a result, a significant portion of PVC and PU waste ends up in landfills or incinerators rather than being recycled.

5. SUSTAINABLE ALTERNATIVES

There are many sustainable and eco-friendly alternatives to PVC and PU available in the market. For example, **BAMBOO PLANT IS AN EXCELLENT NATURAL ALTERNATIVE** IS MADE INTO TRAYS & FURNITURE. Natural fibers like cotton, hemp, or cork can be used as alternatives to PU in fashion and footwear industries. Recycled or bio-based plastics, such as PLA (polylactic acid), can serve as alternatives to PVC in packaging materials.

Ampthill
Hotel Safety 2 in 1 Steamer & Iron

Why Use EMBERTON™ Garment Steamers

Our AMPTHILL Hotel Safety 2 in 1 Steamer & Iron, offers a convenient and effective alternative to traditional ironing. Use for both steam & dry ironing - No iron board required. Professional & wrinkle-free - 2x faster results compared to other steamers.

Time-saving - No hassle to set up ironing boards and waiting for the iron to heat up. Easily steam multiple garments in a short amount of time. Safe & eco-friendly - Garment steamers use only water & heat to generate steam.

➔ Powerful - 1950W
➔ Safety Auto Shut Off - 5 minutes
➔ Continuous Steam Action
➔ Steam Rate 20-30 grams/minute
➔ Long 250cm power cord for convenience
➔ Steam & Dry Ironing - Vertically & Horizontally

IRONING BOARDS

Ironing Board
Engineered Series

Our super strong series of tough ironing board is a result of
extensive research and development with industry
professionals and hotels., working closely to identify
the needs, habits and often rough treatment of hotel ironing boards.

Rugged & Durable - We have combined a rugged
frame with heavy duty metal components and
robotic welds to withstand guests' tough use.

THE ULTIMATE STRENGTH IN IRONING BOARDS

➤ Tube Frame Legs 38mm/28mm
➤ Strong Double Handle Height Adjustment Lever
➤ Steam Flow Metal Mesh Top
➤ 2mm Foam and 5mm Felt Combination Padding
➤ Smooth Binding Edges to Withstand Fraying
➤ Cover Material : Cotton with Felt Underlay
➤ Cover Colour : Charcoal Grey
➤ Frame Colour : Silver Grey

EMBERTON™

INTELLECTUAL PROPERTY
Patents & Registered Designs

TOUGH BOARD - Rugged & Durable; We have combined a rugged frame with heavy duty metal components and robotic welds to withstand guests' tough use.

DUAL SAFE – an organic, thermo-sensitive material, remarkably sensitive to abnormally high temperatures. Upon sensing critical heat levels, DUAL SAFE activates and the electrical current will be interrupted immediately and permanently.

WATER TANK TECHNOLOGY - Special anti-fracture water tank welding technique ensures a permanent seal to prevent water leakage.
